

## Ask speaker

The audience will have the ability, within the app, to send questions to the speaker, which you will be able to view via a website.

If there's no computer or screen in the room you can go to [cms.appinconf.com](https://cms.appinconf.com) and log in with assigned credentials.

Once logged in, a view similar to below appears where you select your session from the list on left and then questions will appear automatically to the right, once they're received. On the right you also have an option to favorite a question by pressing the star button, which you can filter.
