Poster presentations

2. 469-A-1707 Risk factors for late awakening after cardiac arrest and target temperature management. Anna Lybeck Wednesday September 6th Cardiovascular 13:30-15:00 Preben Berthelsen

3. 392-A-1707 Noradrenaline effect is not affected by Losartan in rats after resuscitated haemorrhage. Sofia Jönsson Wednesday September 6th Cardiovascular 13:30-15:00 Preben Berthelsen

4. 419-A-1707 Genetic association of oxidative stress and fluid accumulation makes Balb/CJ mice more sensitive to decompensated heart failure. Medha Becirovic Agic Wednesday September 6th Cardiovascular 13:30-15:00 Preben Berthelsen

6. 439-A-1707 Blood clots in the ECMO-system – a theoretical platelet activation study. Gabriel Fuchs Wednesday September 6th Cardiovascular 13:30-15:00 Preben Berthelsen

8. 599-A-1707 Results from more than twenty years of surgical pulmonary endarterectomy for chronic thromboembolic pulmonary hypertension in Denmark. Dorthe Fosse Nielsen Wednesday September 6th Cardiovascular 13:30-15:00 Preben Berthelsen

10. 428-A-1707 Is there a relationship between halogenated anaesthetic gases and dementia? Anna-Karin Strand Wednesday September 6th General anaesthesia and perioperative medicine 13:30-15:00 Sören Pischke

11. 430-A-1707 Hemodynamic Effects of Intravenous Vasopressin and Nitroglycerine in combination in liver surgery. Ellinor Wielen Wednesday September 6th General anaesthesia and perioperative medicine 13:30-15:00 Sören Pischke

14. 539-A-1707 Perioperative fluid balance, is it true? Marja Lindqvist Wednesday September 6th General anaesthesia and perioperative medicine 13:30-15:00 Sören Pischke

15. 540-A-1707 Midazolam is better than Clonidine in preventing negative postoperative behaviour in children age 2-4. Caroline Zickerman Wednesday September 6th General anaesthesia and perioperative medicine 13:30-15:00 Sören Pischke

27. 398-A-1707 Case of subdural hematoma after labor epidural: Implications for follow-up of post dural puncture head ache. Jan Colden Wednesday September 6th SSAI Education programme in obstetric anaesthesia 13:30-15:00 Vegard Dahl

29. 382-A-1707 Is there a difference in postoperative pain in cesarean section, emergency versus elective, evaluated on the amount of used opioid in the first 24 hours? Neel Wallée Wednesday September 6th SSAI Education programme in obstetric anaesthesia 13:30-15:00 Vegard Dahl
Using a formula when deciding central venous catheter depth from the left avoids unfavourable angle against the superior vena cava lateral wall.

What role does Bone Cement have in the Bone Cement Implantation Syndrome (BCIS)?

The role of the carotid body in systemic sensing of inflammation and oxygen and periphery-to-brain signaling.

Cinaciguat improves intra-abdominal sepsis survival in young and aged mice.

Copeptin, a marker of Vasopressin, predicts coronary artery disease cardiovascular and total mortality.

Outcomes and interventions among out-of-hospital cardiac arrest patients transported to hospital with ongoing cardiopulmonary resuscitation.
