Andrea Porcari – Short Bio

Andrea Porcari, Laurea (M.Sc.) degree in physics, and several years of experience in working in the semiconductor industry. Project manager at Airi (Italian Association of Industrial Research), a not-for-profit organization working with research, industry, financial organizations, public bodies and civil society organizations on strategies and policies for Science and Technology (S&T) development. He joined Airi in 2005, contributing to more than 20 European and national projects aiming to promote emerging and enabling technologies, and sustainable practices in industry. His current interests are related to technology assessment, innovation management, technology transfer, risk analysis, and multi-stakeholder dialogues on S&T. He is member of working groups at UNI (Italian Standard Body) and OECD on aspects related to S&T and sustainable development. Most recent activities related to responsible research and innovation and societal engagement aspects of S&T include the EU H2020 projects Prisma, Gov4Nano, GoNano and SocKETs.
