

Anna Hultin Stigenberg – Short Bio

Dr. Anna Hultin Stigenberg is Technical Director at MAX IV, which is a national laboratory located in Lund, Sweden, that hosts more than 1000 researchers from all over the world annually for materials and life sciences research. MAX IV is the first of a new generation of ultralow emittance light sources and still today one of the most brilliant synchrotrons in the world. She has previously had positions such as Director of EIT Manufacturing North, an Innovation Community within the European Institute of Innovation and Technology (EIT) - that connects the leading manufacturing actors in Europe, and VP Strategic Research at RISE Research Institutes of Sweden. She holds a PhD in Materials science from KTH, Stockholm and has also 25+ years of industrial experience in various senior management positions at the global engineering company Sandvik. A main thread in her career has been the interface between R&D, innovation and the business side.
