

## **Biography**

Dr. Marcel Meeus started his career at Metallurgy Hoboken-Overpelt in 1970 (progressively transformed into the present Company Umicore) and within Umicore he held several and highly diversified functions in Research & Development, production management, battery business line management and as energy storage technology director.

In January 2013, he retired after 42 years with Umicore and started a private consulting company SUSTESCO, Sustainable Energy Services Consulting, specialized in batteries for e-mobility and stationary energy storage. He is author of many publications on battery and hydrogen technologies and amongst others consultant to EMIRI (Energy Materials Industrial Research Initiative) for various low carbon energy applications.
