

Sandrine LEBIGRE is R&D Deputy Director at IPC, the French technical center for plastics and composites. With more than 13 years of experience in R&D collaborative projects, she is in charge of the setting-up and management of R&D programmes at IPC. She manages a team dealing with the identification of R&D and innovation assets in order to position them towards existing funding schemes, the definition of projects' concepts, objectives, impacts and risk assessment. In addition, she is in charge of the coordination of national and European projects: follow-up of the overall progress of the project, management of intellectual property and dissemination of project results.

Since 2017, she has been actively involved in the setting-up and management of various European Open Innovation Test Beds (OASIS, FlexFunction2Sustain and InnPressMe). She has been in charge of the definition of these OITB concepts and their Single Entry Points, the communication towards industries in order to promote the OITBs' services and the setting-up of the associated legal structures.

Sandrine LEBIGRE
R&D Deputy Director
