

Linnea Selegård – Talk title and Short bio

Head of Strategy at development, Saab Dynamics.

Title of the talk:

Advanced materials for Aerospace – The power of long-term industry- academy collaborations and its outcomes

Biography:

Linnea Selegård is since the beginning of 2023, Head of Strategy at development, Saab Dynamics.

Dr. Selegård holds a PhD in Molecular Surface Physics and Nanoscience from Linköping University. In 2014 she started at Saab as a materials expert with special focus on advanced materials. Until beginning of 2023 she headed the department of Materials & Processes at Saab Aeronautics, meanwhile being an adjunct lecturer at Linköping University focusing on nanomaterials for aerospace structural applications. Linnea is also involved in the board of several clusters and competence centers in the area of materials and she has a special interest in novel and advanced materials and the implementation of those into industrial applications.
