

Molecular motors and machines

This session will be dedicated to the biophysical and structural scrutiny of the complex protein machines that carry out crucial cellular functions. Single-molecule as well as integrative structural approaches will take centre stage during this session.

Invited speakers

Gijs Wuite, Vrije Universiteit Amsterdam
Nynke Dekker, Delft University of Technology

3-4 short talks selected from abstracts

Session chairs

Sebastian Deindl, Uppsala University
Dea Slade, Max Perutz Labs/University of Vienna
