

Neutrons in Life Sciences and Biophysics

The session will highlight recent results in the life sciences and biophysics using neutron methods over a wide range of lengthscales, as well as combined exploitation alongside other methods such as X-ray scattering, EM, NMR.

Invited speakers

Henning Tidow, Hamburg University

Hanna Wacklin, European Spallation Source (ESS)

3-4 short talks selected from abstracts

Session chairs

Trevor Forsyth, Lund University

Esko Oksanen, Lund University
