

Biography

Pieter Telleman was born in 1965 in The Netherlands where he received a Chemical Engineering degree, a M.Sc. degree in Biochemistry, and a Ph.D. degree in Medicine. After his PhD he joined the Harvard University where he assumed fellowships in applying micro-and nanotechnology to life sciences. Pieter joined the Department of Micro- and Nanotechnology at the Technical University of Denmark (DTU) as group leader of the Bio/Chemical Microsystems Group. He subsequently assumed the position of director of the department. He concluded an executive MBA in management of technology and joined the MESA+ institute at the University of Twente (UT) as general manager. Both DTU and UT manage large cleanrooms that are used both by academic and commercial users. Recently, he has become involved in a new initiative to expand commercial chip fabrication to meet growing demands in the Netherlands.
