

# CONGRESS OF THE NORDIC ASSOCIATION OF OTOLARYNGOLOGY

May 31st - June 3rd 2017 • Gothenburg • Sweden

| Display No. | Title  | First name         | Last name              |
|-------------|--|--------------------|------------------------|
| 1           | Is the working capacity of people with hearing problems particularly vulnerable to stress and fatigue symptoms?  | Marcus             | Sjöström               |
| 2           | Normative data for diagnosing Auditory Processing Disorder in Norwegian Children aged 7-12 years.  | Tone Stokkereit    | Mattsson               |
| 3           | Single sided congenital conductive hearing loss: Central mapping   | Malin              | Siegbahn               |
| 4           | Virtual reality simulation training of mastoidectomy improves residents' cadaveric dissection performance  | Steven Arild Wuyts | Andersen               |
| 5           | 10 year of vestibular schwannoma surgery-the Sahlgrenska experience  | Rut                | Florentzson            |
| 6           | The fate of the facial nerve after microsurgical removal of the vestibular schwannoma  | Zdenek             | Fik                    |
| 7           | Postoperative complications after Translabyrinthine surgery of Vestibular Schwannoma - increased risk related to age?  | Christine          | Ölander                |
| 8           | A comparison of different techniques in transmastoid surgery for superior canal dehiscence syndrome  | Niklas             | Danckwardt-Lillieström |
| 9           | Balloon Eustachian tuboplasty under local anesthesia: Is it feasible?  | Veera              | Luukkainen             |
| 10          | Long-term results of 275 consecutive bone-anchored hearing aid implantations.  | Tine               | Thorkilgaard           |
| 11          | Performance of a future transcutaneous bone conduction implant measured as mechanical vibrations   | Erik               | Renvall                |
| 12          | Asking about dizziness when turning over in bed - A simplistic assessment of positional symptoms predicts diagnosis of benign paroxysmal positional vertigo (BPPV) | Ellen              | Lindell                |
| 13          | Vestibular Function After Cochlear Implantation: A Comparison of Three Types of Electrodes   | jonas              | frodlund               |
| 14          | Ready Steady Go: Optimization of a Process - Assessment and Planning for Cochlear Implantation for Children and Adults   | Radi               | Jönsson                |
| 15          | The Swedish Grommet Register - an Evaluation of Hearing Outcomes and Reasons for Surgery   | Marie              | Gisselsson-Solen       |
| 16          | Autoinflation for treatment of Otitis Media with Effusion-A Review of the Literature   | armin              | Bidarian-Moniri        |
| 17          | Auto-inflation for treatment of serous otitis media  | Hélder             | Lousada                |
| 18          | Long-term Results of Autoinflation Compared to Grommet Surgery for Treatment of Secretory Otitis Media   | armin              | Bidarian-Moniri        |
| 19          | Dental evaluation in unilateral maxillary sinusitis: a case series   | Don                | Ly                     |
| 20          | Microbial etiology of acute rhinosinusitis during pregnancy  | Laura              | Mäkinen                |
| 21          | Bacterial findings in optimized sampling and characterisation of S. aureus in chronic rhinosinusitis   | Ulrica             | Thunberg               |
| 22          | Chronic rhinosinusitis in relation to occupational exposures - the Telemark population study   | Ulrika K E         | Svensson               |
| 23          | New evidence of increased risk of rhinitis in subjects with COPD: a longitudinal population study  | Joel               | Bergqvist              |
| 24          | Factors associated with symptom relief in septoplasty  | Lars               | Pedersen               |
| 25          | Recurrent Epistaxis Due To Hirudinea A Rare Cause - A Case Report  | Dr Shenny          | Bhatia                 |
| 26          | Trismus and jaw related problems in patients with midfacial fractures  | Martina            | Grinups                |
| 27          | Presence of Weber's glands in the peritonsillar space  | Enni               | Kaltainen              |
| 28          | Peritonsillar abscess: complication of acute tonsillitis or Weber's glands infection?  | Tejs Ehlers        | Klug                   |
| 29          | Experiences of a new self-report instrument for post-operative recovery in children  | Elisabeth          | Ericsson               |
| 30          | Self-reported postoperative recovery in children after tonsillectomy compared to tonsillotomy  | Elisabeth          | Ericsson               |
| 31          | Patient reported outcome of pain after tonsil surgery: An analysis of 32,225 children from the National Tonsil Surgery Register in Sweden 2009-2016                | Fredrik            | Alm                    |
| 32          | Metabolomics and Genes Expression Patterns in Tonsil Tissue after Oral Administration of Lactobacillus rhamnosus GG  | Elisa              | Swanljung              |
| 33          | Nasal steroid treatment for pediatric sleep disordered breathing - a randomized, double-blinded, placebo controlled study  | Gunnhildur         | Gudnadottir            |
| 34          | Efficacy of Uvulopalatopharyngoplasty SKUP3 on sleep quality using the Karolinska Sleep Questionnaire and the Functional Outcome of Sleep Questionnaire            | Joar               | Sundman                |
| 35          | The Effect of Prone Positioning on Obstructive Sleep Apnoea  | Armin              | Bidarian-Moniri        |
| 36          | Positional Therapy for Obstructive Sleep Apnoea- Past, Present and Future  | armin              | Bidarian-Moniri        |
| 37          | The effect of REM and non-REM Sleep versus Sleep Position on the Severity of Obstructive Sleep Apnoea  | Raquel             | Alves                  |
| 38          | The Effect of the Prone Head Position on Respiratory Parameters in Obstructive Sleep Apnoea  | Pedro              | Reboredo               |
| 39          | Demographic Factors Affecting the Responsiveness to Prone Positional Therapy for Obstructive Sleep Apnea   | Hélder             | Lousada                |

|    |   |                  |                |
|----|---|------------------|----------------|
| 40 | transoral robotic surgery: feasibility and learning curve   | Thomas           | Kjaergaard     |
| 41 | Plunging ranula - patient characteristics, treatment and comparison between different populations   | Annina           | Lyly           |
| 42 | Sialendoscopy under local anaesthesia: our experience   | Johanna          | Jokela         |
| 43 | Percutaneous dilatational tracheotomy - a new safe technique  | Gregori          | Margolin       |
| 44 | Two rare cases of laryngeal intralymphatic histiocytosis  | Martin           | Reznitsky      |
| 45 | tracheal resection - an efficient treatment of tracheal stenosis  | Malene           | Hentze         |
| 46 | Bilateral Tapia syndrome - case report  | Jaroslav         | Sýba           |
| 47 | Minimally invasive approaches in thyroid surgery  | Lucie            | Dostálová      |
| 48 | Bacterial flora of the esophagus in subjects with esophagitis   | Elisabeth        | Norder Grusell |
| 49 | GerdQ has a diagnostic value in subjects with atypical symptoms of Gastroesophageal Reflux Disease  | Elisabeth        | Norder Grusell |
| 50 | Synchronized videoradiography, s-EMG and manometry. A study of oro-pharyngeal swallowing in healthy volunteers  | Arman            | Eskandari pour |
| 51 | Within-bolus variability of the Penetration-Aspiration Scale across two subsequent swallows in patients with head and neck cancer   | Johanna          | Hedström       |
| 52 | Correlations between patient-reported dysphagia and penetration-aspiration scores in head and neck cancer patients post-oncological treatment   | Johanna          | Hedström       |
| 53 | Health Related Quality of Life and communication for irradiated laryngeal cancer survivors from pre-treatment to 24 months post-radiotherapy  | Lisa             | Tuomi          |
| 54 | Well-being of relatives to patients with radiotherapy-treated laryngeal cancer: a pilot study   | Therese          | Karlsson       |
| 55 | Early mortality after treatment for Head and Neck cancer - Who and Why?   | Charbel          | Talani         |
| 56 | Detection of distant metastases and synchronous cancer in oral, pharyngeal, and laryngeal cancer: A blinded prospective paired diagnostic study comparing chest X-ray and chest CT to 18 F-FDG-PET/CT | Max              | Rohde          |
| 57 | A prospective randomized study of PET screening in the follow-up of patients with complete remission nine months post definitive treatment of head and neck cancer - the PET-FUP study                | Karl             | Sandström      |
| 58 | Retrospective study of patients diagnosed with Nasopharyngeal carcinoma at Karolinska University Hospital from 2000 to 2010   | Evelina          | Gille          |
| 59 | Cancer of the nasal cavity and sinuses: Treatment and survival in the Swedish population  | Anders           | Westerborn     |
| 60 | Incidence and survival in sino-nasal cancer: a nationwide study from 1980 to 2014   | Charlotte        | Geneser        |
| 61 | Incidence, survival, and progression in children, adolescents and young adults with head and neck soft tissue sarcomas: a nation-wide study from 1978-2014  | Christian Mirian | Larsen         |
| 62 | Long-term outcome and Toll-like receptor 5 and 7 expression in adenoid cystic carcinoma of major salivary gland   | Karoliina        | Hirvonen       |
| 63 | Prophylactic percutaneous endoscopic gastrostomy in advanced head and neck cancer does not cause long-term swallowing problems: A randomized controlled study   | Lars             | Axelsson       |
| 64 | Prospective experience of percutaneous endoscopic gastrostomy tubes placed by otorhinolaryngologist - head and neck surgeons - as safe and beneficial   | Johanna          | Ruohoaho       |
| 65 | Changing profile of oropharyngeal squamous cell carcinoma in Finland  | Lauri            | Jouhi          |
| 66 | Tumor and nodal metastatic volumes and HPV status as prognostic markers in oropharyngeal cancer patients  | Timo             | Carpén         |
| 67 | Surgery for tongue cancer. Does reconstruction improve survival?  | Anders           | Westerborn     |
| 68 | Metastasis of cutaneous squamous cell carcinoma in the head and neck region in western region of Sweden.  | Olle             | Jonasson       |
| 69 | Voices of public involvement - the coverage of patient involvement in a Swedish patient cancer magazine   | Jörgen           | Lundälv        |
